

# Kerrison rongeurs

V. Mueller® neuro/spine  
instruments

V. Mueller®

CareFusion offers a wide range of Kerrison rongeurs engineered for smooth and effective cutting action.

All V. Mueller Kerrison rongeurs feature:

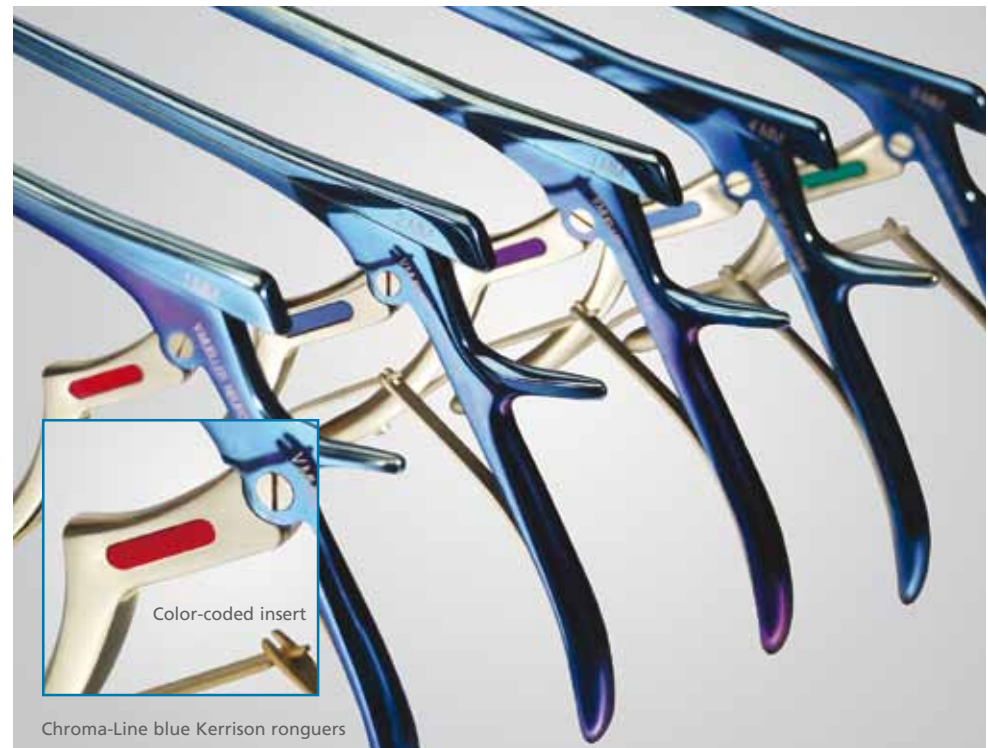

- Revolutionary footplate that combines the benefits of a thin footplate for access to critical anatomical areas and the cutting strength of a standard footplate
- Sharp, long-lasting cutting edge
- Optional ejector is built into the shaft to further decrease the possibility of particles being caught between the upper and lower shaft
- Micro handles for a comfortable grasp and sensitive feedback, available in 7" to 12" shaft lengths, with and without an ejector option, in 10 mm and 15 mm bite openings
- Quality German craftsmanship for durability and sensitive feedback

Chroma-Line blue Kerrison ronguer ejector

T-Coat Kerrison ronguer ejector

## Chroma-Line® blue Kerrison rongeurs

These unique blue Kerrisons feature:

- Titanium nitride coating reduces friction between metal parts for smooth and effective cutting action
- Color-coded insert identifies bite size for easy recognition in the OR

## T-Coat Kerrison ronguers

- Gold-color titanium nitride coating reduces friction between metal parts for smooth and effective cutting action
- Peened design of screw reinforces its placement over time and use, helping to prevent loss of screws

## Chroma-Line stainless steel Kerrison ronguers

- The stainless steel Kerrison ronguers feature color-coded inserts that identify bite size for easy recognition in the OR
